The six Apple Intelligence features that change classroom work.

iPad-first, privacy-aware, takes 10 minutes to learn.

Apple Intelligence runs mostly on your device — a genuine GDPR advantage when your work involves sensitive content. These six features give you the strongest daily return. Details on what leaves the device are in Part 3 of the full guide.

Six features, one pocket

1
Writing Tools
Rewrite, proofread, summarise. Grading comments, parent emails, lesson plans. Most on-device.

2
Siri 2.0
Context-aware scheduling, cross-app retrieval. On-device for nearly everything.

3
Mail categorisation
Primary / Transactions / Updates / Promotions. Find the email parents actually ask about.

4
Notification summaries
50 overnight alerts become one readable line. On-device, entirely.

5
Notes + Image Wand
Sketch or describe → polished illustration for worksheets and whiteboards.

6
Visual Intelligence
Point the camera at text or objects for translation, summaries, context.

Try it: 5 practical tasks.

Ten minutes, five moves, one less thing on your plate tonight.

1 **Rewrite a parent email in three tones**
Writing Tools offers Friendly / Professional / Concise. Pick the one that fits, send.

2 **Summarise a 5-page curriculum PDF**
Drop the PDF into Notes, ask Writing Tools for a summary. Private Cloud Compute handles the long input.

3 **Ask Siri for Thursday's schedule**
"Open Notes for Thursday's planning" and "Email the Year 9 parents about the trip" in one breath.

4 **Triage a flooded inbox**
Mail Primary shows the three parent questions that actually need answers; the rest is grouped quietly below.

5 **Sketch a diagram in Notes**
Rough circles and labels become a whiteboard-ready illustration via Image Wand.

• WATCH OUT · AGE-GATES AND DATA

Some features are 18+; verify your national rules for student-facing use. De-identify documents before Apple Intelligence processes them. Disable ChatGPT integration on school devices by default — it sends text to OpenAI and opens a different privacy conversation entirely.
