VOL. 49

Glossary

A few terms that recur throughout this guide. If you already know them, skip ahead to the framework on the next page.

AI — Artificial Intelligence

An attempt to make machines mimic brain functions — to "think" and learn roughly the way humans do. We don't fully understand how the brain works, but we can try to replicate the parts we do understand.

Prompt

An instruction given to a chatbot to get a desired response or task performed.

Iterate

After receiving a response from a chatbot, you refine and clarify the parts you're not satisfied with — sharpening the answer until it's what you want. The better your starting prompt, the fewer iterations you'll need.

Chatbot

A chatbot has been trained to find patterns in large amounts of text. It uses those patterns to generate a response to your prompt. The answer is produced in real time.

GPT

The underlying model (Generative Pre-trained Transformer) that a chatbot uses. The same GPT can power different chatbots — for example, Copilot and ChatGPT have both used OpenAI's GPT.

Generative AI

AI that creates (generates) text, images, video, or sound in real time when prompted to do so.

Bias

AI responses can be skewed or partial, depending on the data the AI was trained on and the biases present in that data. These biases are harder to spot in chatbots than in image-generating AI.

Hallucination

The text you receive from a chatbot is based on patterns in its training data, but word generation also involves randomness — meaning generated words can sometimes create a meaning that simply isn't true.

A framework for writing your own prompts

Role: Act as an experienced physics teacher.

Task: Create a lesson plan that introduces year 8 students to optics.

Context: I teach at a middle school, have 25 students in my class, and the lesson is 60 minutes long.

Format: Link content and activities to the physics curriculum and give me a plan that describes each part of the lesson and the materials required.

Tone: Use a formal but friendly tone.

A few chatbots to know

AI can also generate images and more, but we focus here on chat capabilities.

ChatGPT — OpenAI's chatbot

Gemini — Google's chatbot

Gemini Notebook — Google's tool that can, among other things, generate a two-voice podcast

Copilot — Microsoft's chatbot

Claude — Anthropic's chatbot

Perplexity — From San Francisco, was early to include source links

Duck AI — DuckDuckGo's chatbot, lets you pick among several GPTs

Mistral AI — A chatbot from France

Most chatbots have age restrictions.

BEFORE YOU START

How to use the prompts

All the prompts are starting points — examples to get you going.
Adapt them to fit your context.

After using a chatbot for a while, you'll learn what kinds of prompts work better or worse. Try the same prompt twice — first as-is, then with the prefix "Act as an experienced expert teacher in [subject]" — and see whether the quality of the response improves. A good response means a good prompt. A poor response means the prompt needs more context or adjustment. Some chatbots are better than others at certain tasks, so if you're not satisfied despite multiple tries, consider switching chatbot.

Brackets and privacy

You paste the prompt text into the chatbot's input field. Wherever brackets *[like this]* appear, replace the text inside with whatever fits your context.

Always double-check the responses — chatbot output is not guaranteed to be accurate.

Note: Think carefully before uploading texts or documents. Never upload personal data or sensitive information. Mind GDPR.

20 PROMPTS

School Psychologists

01 Create a plan for an individual session with a student in *[grade X]* who is struggling with *[specific challenge, e.g. concentration or anxiety]*, including three steps and a follow-up strategy.

02 Give me five strategies for supporting a teacher at a *[primary school]* in understanding and managing *[specific student behaviour, e.g. acting out]*, with one idea for each.

03 Write a brief guide for introducing a *[grade X]* student to strategies for managing *[specific issue, e.g. performance anxiety]*, with three simple techniques.

04 Suggest three ways to collaborate with the student health team at a *[primary school]* to map *[specific issue, e.g. mental health concerns]*, with one method for each.

05 Create a list of five short questions to open a conversation with a *[grade X]* student about their feelings regarding *[specific situation, e.g. family problems]*.

06 Give me an example of a routine for conducting a psychological assessment of a *[grade X]* student's *[specific area, e.g. learning difficulties]*, with three steps.

07 Suggest three ways to lead a workshop for a *[grade X]* class on *[specific theme, e.g. stress management or emotional regulation]*, with one activity for each.

08 Write a brief template for documenting a psychological observation of a *[grade X]* student at a *[primary school]*, with three sections (e.g. background, behaviour, recommendations).

09 Give me five ideas for strengthening a *[grade X]* student's coping strategies in *[specific situation, e.g. changing schools]*, with one method for each.

10 Create a list of three short reflection questions for a *[grade X]* student after a session on *[specific topic, e.g. self-image]*, to capture their thoughts.

11 Suggest three ways to collaborate with the parents of a *[grade X]* student to support the child's *[specific need, e.g. structure at home]*, with one strategy for each.

12 Give me an example of a straightforward analysis of a *[grade X]* student's mental wellbeing in *[specific context, e.g. the classroom]*, with three observations and one recommendation.

13 Write a list of five resources (e.g. books, apps) for a school psychologist at a *[primary school]* supporting *[specific topic, e.g. neuropsychiatric diagnoses]*.

14 Suggest three ways to manage a crisis response in a *[grade X]* student following *[specific event, e.g. bereavement]*, with one action for each.

15 Create a template for a short staff presentation at a *[primary school]* on *[specific theme, e.g. brain development]*, with three key points.

16 Give me five ideas for promoting a positive classroom climate for a *[grade X]* class at a *[primary school]*, with a focus on *[specific goal, e.g. a sense of safety]*.

17 Suggest three ways to introduce a *[grade X]* student to mindfulness exercises for managing *[specific issue, e.g. worry]*, with one exercise for each.

18 Write a brief guide for supporting a teacher at a *[primary school]* in adapting instruction for a *[grade X]* student with *[specific need, e.g. ADHD]*, with three tips.

19 Give me an example of a routine for evaluating the psychosocial environment of a *[grade X]* class following *[specific event, e.g. a conflict]*, with three steps.

20 Create a list of three brief ways to collaborate with the school counsellor and special education teacher at a *[primary school]* to support *[specific goal, e.g. students' self-regulation]*, with one example for each.
